# CarbonWorks

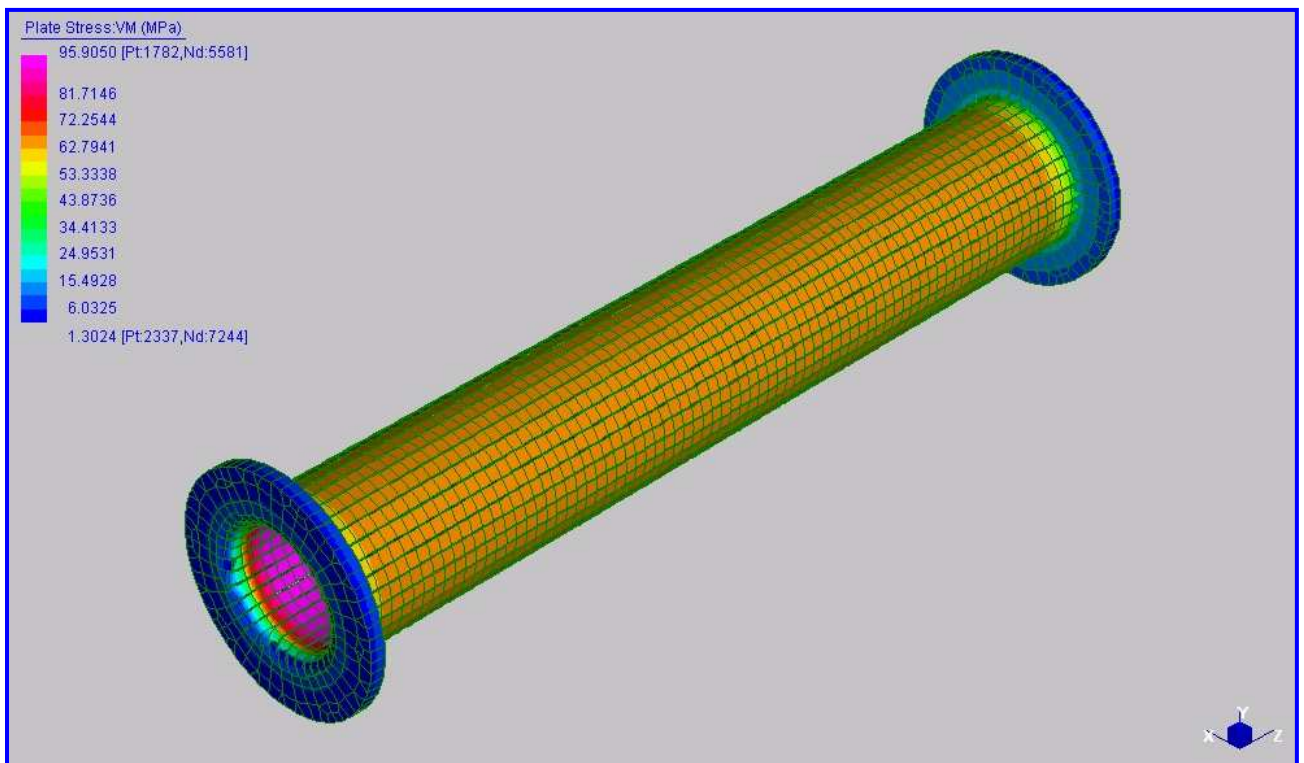

## An Introduction

Carbonworks specialises in the manufacture, design and supply of lightweight structures. Past projects include; Automotive Parts, Sporting Goods, Carbon Yacht Masts, Theme Park Equipment, Film Set Equipment and Rescue Equipment. Carbonworks has many years of experience in materials sourcing, process specification, component manufacture and personnel training.

CarbonWorks uses the latest technology such as parametric solid modelling and FEA to ensure its designs meet the required specifications.

Carbonworks has developed a network of Manufacturing Engineers, Metal Finishers, Composite Fabricators, Industrial Designers and other Skill Sources, enabling nearly any project to be completed competently. Peter Schwarzel is happy to refer you to the skill base or other resource that you may need with your project.

Carbonworks is dedicated to high quality, on time solutions. Whether it is the simplest manual calculation or a complex computer model coupled with high tech manufacture and testing, Carbonworks can do it.
